PROFESSIONAL EXPERIENCE

DFW Software Consulting
Mar 2025 - Present

Full Stack Engineer (Contract) | Primary engagement through Lumara Technologies LLC

- Led architecture and delivery for Emmut Properties with a four-developer team, replacing legacy software for **1,000+ units** using Next.js, TypeScript, PostgreSQL, and Prisma.
- Cut daily administrative work from **3 hours to 1 hour** per employee by automating invoicing, financial calculations, and reporting.
- Rebuilt building-alert email delivery with durable PostgreSQL jobs, idempotent requests, and bounded retries; tested interrupted and concurrent workers against PostgreSQL and SMTP.
- Led a five-developer team building CM Data's truck damage estimator; designed its Node.js API and built most of its React/Next.js frontend.

Craft Digital
Jul 2026 - Present

Full Stack Engineer (Contract) | Through Lumara; Joshua Tree Experts platform

- Migrated **seven production lead-intake workflows** from Kestra on AWS to n8n on Railway, with durable intake, crash recovery, and payload reconciliation.
- Built Python/dbt reporting pipelines for 27 franchises plus corporate and tenant-scoped Next.js/PostgreSQL dashboard readers that prevent incomplete or mixed-generation audience exports.

Independent Consulting
Jan 2022 - Present

Full Stack Engineer | Founder, Lumara Technologies LLC (2025 - Present)

- Lead backend engineering for a confidential mixed reality platform using FastAPI, PostgreSQL, AWS, and Unity/C#; built Redis shared state and resumable server-sent events with backpressure.
- Implemented channel authorization, scoped role-based permissions, Cognito safeguards, and OpenAPI contract checks for Unity integrations.
- Defined development AWS ElastiCache infrastructure in Terraform with private subnets and application-scoped security groups.
- Delivered a subscription music platform with Next.js, Prisma, tRPC, Stripe, and AWS S3/CloudFront.

INFRASTRUCTURE AND OPEN SOURCE

- Built and operate an inference server with six NVIDIA RTX 3090 GPUs (144 GB combined GPU memory) and a Proxmox homelab with a dozen services, automated provisioning, and Tailscale-only SSH.
- Contributed a merged ExLlamaV3 C++ optimization improving cold prompt throughput **18%** (1,238 to 1,458 tokens/second) on a six-GPU benchmark; decode speed unchanged.
- Contributed a merged TabbyAPI Python recovery fix releasing the previous generator before replacement to prevent overlapping main-process host caches; added an object-release regression test.

ExLlamaV3 PR #447 | TabbyAPI PR #493

TECHNICAL SKILLS

TypeScript, React, Next.js, Node.js, Go, Python, FastAPI, PostgreSQL, Redis, AWS, Railway, Docker, Terraform, GitHub Actions, Playwright, pytest

CERTIFICATIONS

AWS Certified Developer - Associate | AWS Certified Cloud Practitioner
